Hello,

I am a special ed teacher and I would think it would be very helpful to have tutors in my building, There would be very little loss of time in comparison to what I have experienced. If the parents can afford it, they have to take the child out of school and then MAYBE return the child back to school. There would be such a stronger line of communication too, if a tutor was in the building. I only see positives if tutors were allowed on school property.

I have been with Portland Public Schools for over 20 years and a tutor has never been allowed into any building that I was in.

I support SB 1002.

Respectfully,  
Shannon Cooper
