

Dear Rules Committee Members,

Having a national popular vote to elect the President of the United States would be the worst thing for Oregon voters EVER!

Having a national popular vote would completely eradicate all low populated states, turning our elections into mob rule. This is not how a representative republic is governed.

The Electoral College guarantees that the elected president, is elected by a vote sufficiently distributed across the country preventing an election being determined by a few states with the largest metropolitan areas.

Please keep our Republic; vote NO on HB 2927.

Becky Lemler  
Lane County
