

I am writing to express my support for HB 2927, which would enact the Interstate Compact for Agreement Among the States to Elect the President by National Popular Vote.

After much thought and consideration, I feel that the electoral college, as it is currently structured, no longer allows electors to represent the will of the people of this country. In a country whose Constitution begins with the words, "We the People" the will of the few electors should not be allowed to override the will of the many!

Please support this legislation and bring it to a vote! This will ensure that individual votes will once again count, and end the unfair and skewed practice of national candidates campaigning only in states with the largest number of electoral votes.

**Sincerely,
Darcy Kramer
