

Dear Rules Committee Members, Shouldn't America's President be the candidate who receives the most votes of the people, like in all other democratic countries? Our President represents all of Americans, shouldn't every American citizen's vote count the same?

The National Popular Vote Compact, when adopted by a sufficient number of states, will free us from the archaic and undemocratic Electoral College and bring our Presidential election process into the 21st century.

Please support this common sense, bi-partisan measure and move it quickly to the House floor for a vote.

Thank you,

Jim Gilbert
