

We are retired, living on our Social security and the rent from our duplex in which we live, in Washington County and a small house in Portland.

We have taken risky tenants to give them a chance several times. Sometimes it has cost us, but we figured it was worth it, as we could get them out without too much risk.

If the controls you contemplate are passed, we will have to change our methods or change our investment to eliminate all risks.

Ron Reinebach
