

Hello,

I am writing in opposition allowing those with a NP degree to complete vasectomies. I attended 4 years of medical school as well as 3 years of family medicine residency and vasectomies are not under my scope of practice. Certainly someone with far fewer years and hours of training should also not have these privileges. If they desire to perform vasectomies, they can obtain the appropriate surgical training by becoming a MD or DO. An online degree is NOT appropriate surgical training and this is a very dangerous precedent. Please protect our patients and ensure they have the best quality care.

Thank you

Nicole Gilg Gachiani, MD, MPH  
Section Chief  
Primary Care Clinic
