

I hope I am not too late in submitting my comments in support of this very important bill. It is critical that we have firm deadlines to retire and retrofit dirty diesel engines that are still in use. It is disheartening to witness industry winning every battle that pits clean air over profits. I would ask Senator Roblan to support the bill in its original form which offered a clear path towards addressing our toxic air, especially in population rich Portland. Please do everything you can to fight for cleaner air for Oregon. Thank you, Cordelia Tilghman
