

We are writing in support of HB2927, the National Popular Vote Interstate Compact. This is one of the few ways our national electoral system can be improved to reflect the actual will of those who vote in national elections. Please do all you can to move this bill out of committee to a vote in the whole House and then to a vote in the Senate, so that Oregon can join the ranks of other states in the NPVIC. States signing on to this agenda will create their own momentum for positive change. If that prediction proves false, our state has lost nothing, but perhaps has helped further a national conversation toward future change.

Thank you,
