

Please pass the strictest diesel standards possible. Just driving behind a diesel truck makes me feel sick. Portland has lost its reputation as a healthy community for a good reason. The toxic pollution from industry's diesel, glass factories, Intel's poisonous emissions and the toxic spraying of our roadways, farms, forests and parks with cancer causing Roundup, 2,4-D, Atrazine and Chlorpyrifos have caused sickness to skyrocket. We don't need more economic growth at the expense of the health costs it is causing our citizens. The health costs of all these emissions are well document. Please consider the medical research on diesel fumes impact on our health costs and sickened population when you amend and vote on SB1008.

Thank you for recording my comment.
