

To Members of the Senate Rules Committee:

Please post my comments for the record:

I was hopeful that this would be the year Senator Dembrow's efforts to begin dialing back dirty diesel would get a fair hearing in the Senate. I attended the first hearing on SB 1008 but have not been able to return due to family responsibilities. But I'm strongly in support SB 1008 and hoped it will be restored and our legislators will not cave into the corporate lobbyists who have so far stopped this bill from moving to a floor vote.

The least you can do is let it come to a vote!
