

Chair and Members of the Senate Rules Committee

I would like to express my strong support for SB1008 and the proposed -3 amendment. It is very important to prohibit adding pre-2007 engines to fleets and the legislature also needs to set deadlines for all on-road fleets and off-road construction equipment to be running on clean engines. Diesel fumes are polluting our air and affecting the health of our children and all of our citizens. We are the laughing stock of corporations that are using vehicles that are not allowed in other states. The amendment that will prohibit the addition of pre-2007 diesel engines to Oregon fleets is extremely important. As a public health professional, I urge you to support this amendment.

Thank you,

Katie
