

Dear Oregon House Rules Committee Member,

Oregon needs to:

- Hold GMO patent holders responsible for contamination events — not pit farmer against farmer.
- Protect high-value crops in Oregon, such as specialty seed, wheat and alfalfa, which have been put at significant risk by GE contamination.
- Protect communities from the unwanted presence of invasive GE weeds, such as Creeping Bentgrass, now de-regulated and spreading in Malheur and Jefferson counties.

Please Support House Bill 2739

Thank you,

Dan Fellman
Ashland Oregon
