**Subject:** HB 2198 Oregon Liquor & Cannabis Commission rule changes

HB 2198 Page 58/186

Section 108. ORS 475B.705

2 (a) 17 percent of retail sales price of marijuana leaves;

Cannabis leaves are not consumed or sold. So, therefore should not be taxed, or included as a consumable product, or counted as part of the allowed amount of Cannabis (marijuana) to have in possession. The Fact that Cannabis leaves are not a consumable product would effect other parts of this Document. Leaves should not be sold for consumption in leaf form. Would be acceptable in tinctured form, as part of a bubble hash, drinking tea or other products.

---

Oregon Legislator's have made being a Care Provider for Medical Cannabis Patient's so complicated, many Medical Cannabis Patient's are going to lose their Cannabis Care Providing Growers. There must be a simpler way to handle the situation. These regulations are going to have a bad effect on Medical Cannabis Disabled Patients.

---

Where is the section protecting Medical Cannabis Patient's Rights to Privacy of their Medical Records including Cannabis? Dispensaries continue to collect data on Medical Cannabis Patient's, but protect Recreational users information. Gathering data is important for the research of Cannabis. But, product information should be collected, then sent to OHA daily and then deleted to protect Patient's privacy.
