

Dear Chair Williamson,

Please oppose HB 2739 which would hold seed patent holders of genetically engineered (GE) crops financially responsible if a GE plant is found where it wasn't intentionally planted.

This bill stigmatizes GE crops based on the irrational fears of extreme environmentalists. It makes no sense to make patent holders should responsible for the actions of the people who use their product. Please support Oregon agriculture and vote NO on HB 2739

Sincerely,

James Monsen-Daniels
