

Dear Representatives,

I just found out about the public hearing for Senate Bill 990.

Since I work, I can not make the hearing to voice my concerns about this bill.

So, would you please take this as testimony.

I am against this bill. We are located in an area where "the big" earthquake could wreck

serious damage to infrastructure of all kinds. As we see with Fukushima disaster several years ago.

Cleaning up nuclear waste from an accident is impossible. Fukushima reactor is still spewing radiation.

All nuclear reactors, small, medium or big should follow proper siting regulations.

In addition this present federal government is cutting the funding to EPA and other agencies that

could help with the cleanup of a nuclear disaster. We need to protect our environment.

Please, I say NO to Bill 990.

Thank you,

Kapa Korobeinikov

Dear Maria Herandez

Please include this as testimony against Senate Bill 990,

I just found out about the public hearing for Senate Bill 990.

Since I work, I can not make the hearing to voice my concerns about this bill.

So, would you please take this as testimony.

I am against this bill. We are located in an area where "the big" earthquake could wreck serious damage to infrastructure of all kinds. As we see with Fukushima disaster several years ago. Cleaning up nuclear waste from an accident is impossible. Fukushima reactor is still spewing radiation. All nuclear reactors, small, medium or big should follow proper siting regulations. In addition this present federal government is cutting the funding to EPA and other agencies that could help with the cleanup of a nuclear disaster.

Remember how opponents of seat belts, no smoking in public spaces, and field burning cried how that regulation was going to destroy..... ? Same will happen here.

Please, I say NO to Bill 990.

Thank you,  
Kapa Korobeinikov
