**Subject:** testimony for SB 990

Dear Senators,

I am writing to register my objections to SB 990. All nuclear power projects, regardless of scale, should be rejected until the profound issue of safe storage of nuclear waste has been successfully dealt with. As the ongoing disaster at Hanford Nuclear Reservation demonstrates, the health and safety challenges of dealing with nuclear waste are of the highest priority. Generating yet more nuclear waste must not be allowed.

Please defeat Senate Bill 990.

Respectfully,

Charles Goodrich
