Subject: Please OPPOSE HB 2739 and Protect Oregon Farmers
Date: Monday, May 22, 2017 7:20:04 PM

Dear Chair Williamson,

Please oppose HB 2739 which would hold seed patent holders of genetically engineered (GE) crops financially responsible if a GE plant is found where it wasn't intentionally planted. How can someone be held responsible for something they did not plant? This bill is on the crazy side and potentially unfair. Please review it carefully before you vote, but

Please support Oregon agriculture and vote NO on HB 2739 Thank you

Sincerely,

Bonnie Christensen
