Subject: Testimony for the Record

Dear House Energy and Environment Committee:

Eugene PeaceWorks is descended from the organization that helped pass the 1980 moratorium on the financing and construction of nuclear power plants. Many of us activists and voters are disturbed and dismayed to hear of the creation of a loophole to that law through SB 990. The two conditions for ending that moratorium have not been met. There is no permanent nuclear waste repository. Nor have the voters state-wide approved a new plant. The exemption that SB990 allows is in violation of the clear mandate the voters provided. We urge you to respect the will of Oregonians to keep our state nuclear free.

David Zupan, President
Eugene PeaceWorks Board
