Vote NO on SB 990

SB 990 is contrary to the Voter-approved moratorium in Oregon on nuclear power plant construction until a safe radioactive waste storage exists (*O.R.S. § 469.595*).

Small modular reactors would disperse high-level hazardous radioactive waste and require that spent fuel rods still be stored in on-site in cooling ponds (just as they are for toxic fuel rods from PGE's Trojan Nuclear power plant).

Small modular reactors not clean, safe, economically sound or energy efficient. It is not a solution, the growth and future of clean energy (wind and solar) and energy efficiency are better investments.

I urge members of the Committee on Energy and Environment to a vote NO on SB 990.

Sincerely,

Marian Grebanier
