

Damon Motz-Storey

Testimony opposing SB 990 - No loopholes for nuclear power

24 May 2017

Chair Helm, Vice-Chair Johnson, Vice-Chair Power, and Members of the House Committee on Energy and Environment,

Thank you for the opportunity to testify today. For the record, my name is Damon Motz-Storey. I am on the staff of Oregon Physicians for Social Responsibility and I am a resident of Representative Keny-Guyer's district in southeast Portland. I am here today to express my dismay at the Senate's passing of SB 990 and to urge you not to support this misguided bill or the principles contained in it. Nuclear power has not reached the point of being safe enough in order to qualify as a socially responsible source of power. The health impacts of radioactive waste are too great to ignore.

For several years in the early 1990's, my parents taught English in a town called Sasebo just outside of Nagasaki, Japan. They saw firsthand the lasting generational trauma of Nagasaki's nuclear bombing from World War II. My family has remained very good friends with many of their colleagues from Japan. When the Fukushima reactor melted down, their reactions were largely along the lines of: "Here we go again, radioactivity will once more harm and end lives and break apart Japanese families and communities."

This perspective was important as I grew up amidst the rapid acceleration of deadly climate change. It is very clear to me that nuclear technology as it stands has no place in the rapid and just transition to clean and renewable energy that our climate and communities so desperately need. As a young person fresh out of college and at the very beginning of my career, I am deeply concerned about the extremely long-lasting impacts of radioactive waste. There is a lot of skin and breast cancer in my family, so I know that no family deserves to be impacted by the tragedy of cancers and the other health impacts of living near nuclear waste.

I strongly urge you to oppose SB 990 so that no loopholes to Oregon's sensible 1980 moratorium will be created that could allow harm to the health of Oregon's families. I hope to have a whole lot of decades ahead of me, I'd like to see that future powered by wind, solar, and other truly renewable forms of energy, not nuclear power. Thank you.

Wednesday, May 24th, 2017

Chair Helm, Vice-Chair Johnson, Vice-Chair Power, and Members of the House Committee on Energy and Environment,

I strongly urge you to reject SB 990 and protect the health of Oregonians from the threat of nuclear waste.

In 1980, Oregonians voted to require that statewide voter approval and a permanent disposal site is built for the highly radioactive and long-lived waste it generates, before any new nuclear power plants be built in the state. Nearly 40 years later there is still no permanent disposal site established for high-level radioactive waste – yet SB 990 in Oregon’s State Legislature would allow some types of nuclear power plants to be built.

The extremely difficult problem of safely storing nuclear waste that remains lethal for centuries and dangerous for millennia has not been solved. Senate Bill 990 is a bill that would create a special exemption from Oregon’s 1980 voter-passed moratorium on nuclear power plant construction for small modular reactors. Instead of requiring a statewide vote, the bill would allow cities and counties to vote for nuclear reactors of 300 megawatts or less without a permanent repository for the high-level radioactive waste they would create.

The proposed smaller reactors create the same kind of high-level radioactive waste generated at Oregon’s now-closed nuclear power plant, Trojan (1,000 megawatts) created. The orphaned waste from Trojan still sits in heavily shielded casks on a concrete pad next to the Columbia River, awaiting permanent disposal. Should the shielding fail for any reason, workers would receive a lethal dose of radiation within minutes even though the plant has been closed for more than two decades.

We have a moral obligation to protect the Oregonians from the health and financial impacts of the generation of more nuclear waste that we still have no plan to safely dispose. Add your name to our sign-on letter to tell your legislators to reject Senate Bill 990 and keep our nuclear waste protections intact.

Sincerely,

Board of Directors
