I urge you to vote no on HB-2004-A. This is much to much government control. This will only encourage landlords to sell their rentals and invest in other things with less hassle which would mean less rentals and higher rents. This bill would be the final straw that gives landlords little control over their property and investment. The climate is already in favor of the renter with not much favor for the landlords position. This is a serious bill and just another right will be taken from the landlord. Please vote no. I have been a landlord for many years and am feeling I have no rights or control over my rentals now.
