As you consider HB 2681, please know that it's fate will have a huge impact on the solar industry in Oregon! If the tax credit for solar goes away, I anticipate our business dropping by a minimum of 50-60%. I will have to lay off employees, and while I doubt it would completely put me out of business, it will be a serious blow to our financial stability as a company.

This tax credit has created thousands of jobs, allowed thousands of homes to lessen their environmental footprint, and inched Oregon ever closer to its sustainable energy goals.

It would be a giant step backwards to let it expire now!
