Subject: Cutting Renewable Energy Tax Credits will cost Oregon way more than it saves
Date: Friday, June 02, 2017 9:04:30 AM

Please support the RETC. The money saved on electric bills isn't exported: it circulates throughout Oregon's economy.

And has done so since 1978, while providing Oregon families with over 570,000 tax credits to help them enjoy warmer, safer homes and become more energy efficient; fueling hundreds of businesses that support more than 41,000 Oregon jobs; and reducing pollution and greenhouse gas emissions by saving Oregonians more than 2 million kilowatt hours of electricity annually.

Please support and strengthen RETC when considering HB 2681/SB 177.
