Members of the Joint Tax Credit Committee:

I was born and raised in Oregon. Our clean air, clean water, abundant wildlife and pure untamed beauty has inspired many. Oregonians are smart, innovative and connected with the land. Solar has provided me with over 10 years of employment, even through one of the USA's worst economic slowdowns! Regenerative actions such as investments in renewable energy are necessary to allow Oregon to grow while maintaining our most precious resources. We have the power and obligation to continue leading our nation.

Thank you.
