Subject: Senate Bill 860 - reduces costs for insurers
Date: Monday, June 05, 2017 11:14:58 AM

I am writing in support of this bill. Access to mental health treatment is an enormous factor in decreasing the cost of bills for physical health concerns. There are panels I cannot afford to be on because they reimburse so poorly. The subscribers to those providers are denied access to the range of clinicians they might otherwise be able to access. Delayed access to mental health care increases physical health complaints and costs. This bill will go far to reducing overall costs for insurance companies.

Thank you,
