Subject: HB 2927 National Popular vote

Dear Committee,

I vehemently oppose a national popular vote. It ignores the less populated areas of our country. One only needs to look at Oregon to see how the results of a popular vote. Essentially anyone who lives outside of the Willamette Valley is disenfranchised and forced to live under the rule those that live in a small geographic area and are likely to not even attempt to understand the issues in the remote areas where there vote does not count in state elections.
