

Senate Committee On Rules

Chairs Burdick and Vice-Chair Ferrioli and members of the committee

I STRONGLY OPPOSES HB 2927 and SB 825 – National Popular Vote

I count it my constitutional duty to share the reasoning why I strongly oppose the National Popular Vote Compact, and it is your constitutional oath that dictates that you oppose them too.

I have found that the general public has bought into the notion that "every vote counts" that is the marketing ploy for the National Popular Vote. But, I'm sure you recognize that "every vote" doesn't not count under a compact and the public is willfully ignorant of what these bills do.

Oregon has been known for its individualism and separation from the pack. Informed Oregonians would never agree to give away every vote in Oregon to a Compact that will determine our vote for us. If Oregon is lumped into a Compact with California or any state with more voting power than we have, we would never have our votes counted because California's votes would dictate the vote. I don't call that as "every vote counts" nor would any Oregonian if they knew what this bill does.

This bill is further from every vote counting than the Electoral College, which weighs every vote so smaller states are weighted more than more populated states giving Oregonians a 1.3 vote value compared to New York's 1.0 vote value, and Oregon has a 1.6 vote value compared to California's 1.0 vote value.

Don't give away our sovereignty to vote as a state. Please vote NO on these bills and continue our independent sovereignty assuring the highest vote value possible in the Electoral College.

Marion County

I STRONG OPPOSITION HB 2927 – National Popular Vote

I count it my constitutional duty to share the reasoning why I strongly oppose the National Popular Vote Compact, and it is your constitutional oath that dictates that you oppose it too.

I have found that the general public has bought into the notion that "every vote counts" that is the marketing ploy for the National Popular Vote. But, I'm sure you recognize that "every vote" doesn't count equally and less so under a compact. The public is willfully ignorant of what this compact means to the value of their vote.

Oregon has been known for its individualism and separation from the pack. Informed Oregonians would never agree to give away every vote in Oregon to a Compact that will determine our vote for us. If Oregon is lumped into a Compact with California or any state with more voting power than we have, we would never have our votes counted because California's votes would dictate the vote. I don't call that as "every vote counts" nor would any Oregonian if they knew what this bill does.

This bill is further from every vote counting than the Electoral College, which weighs every vote so smaller states are weighted more than more populated states giving Oregonians a 1.3 vote value compared to New York's 1.0 vote value, and Oregon has a 1.6 vote value compared to California's 1.0 vote value.

Don't give away our sovereignty to vote and be counted as a state. Please vote NO on these bills and continue our independent sovereignty assuring the highest vote value possible for Oregon voter under the Electoral College.
