

As a US citizen and Oregon resident and voter, I strongly support HB 2927-passing the National Popular Vote Interstate Compact [NPVIC].

I believe that the most important election in our country should be decided, as other elections are, based on the principle of 'one person, one vote'.

With this change to the way electoral college votes are cast we can insure a democratic outcome to our presidential elections. I fail to see any benefits of maintaining the current statewide 'winner take all' method which allows for the possibility of the candidate with potentially many millions of fewer votes winning the presidential election.

This is a matter clearly assigned to state legislators by our constitution. Please do not shirk your constitutional duties, pass HB 2927 (and NOT SB 825) and put our country another step along the path in advancing to our ideal, democratic principles.

Sincerely,

William Towery
