

Oregon

By going to popular vote you are ignoring the reason that the electoral college was designed for - to protect the rights of many from over populated, one dimensional groups.

Are politicians now becoming so lazy they only want to go city to city and ignore those in the outlying areas. It is so convenient for thousands to take time off and flock to a city to listen to a politician who should be coming to them!

Lazy Politicians.

Any other way you would like to tilt the voting process so you can win?  
Oregon Legislature or Russian influence.
