Senate Rules Committee  
OR

Dear Committee,

The Electoral College is an insult to representative democracy. The idea that a small number of voters spread across a number of lightly populated states should have more significance than millions of voters is absurd. Three million more Americans voted for Clinton than Trump and yet this disgraceful, contemptible man is now running our country into the ground. The Electoral College serves the same purpose nationally that gerrymandering does locally.

Sincerely,

Mr. Fred Fawcett
