---

*My neighborhood has changed a lot since I moved in, and I worry about the government decisions that might be made that will change the character and livability here even more. I am deeply concerned that HB2007 would allow multiple units throughout the state (Accessory Dwelling Units are already allowed and are fine in single-family neighborhoods-a rational and intelligent solution for adding density). HB2007 would rob cities of local control, bypass safeguards, and, by extension, demolish citizen and neighborhood influence, just as surely as it would continue on steroids the demolition of affordable housing and the tree canopy.*

*Please study this issue carefully and listen to the neighborhood associations and their concerns.*

*Thank you,  
Jean Ellero
