

I want to express my support for SB2927. This legislation is important to ensure equal representation for all Americans within our government. Referring the issue to the voters will only delay implementation of this important legislation at a time when it is being passed in many states around the country. It would also allow for this issue to be politicized by outside interest groups when it should simply be a non-partisan way to make "one person, one vote" a reality in 21st century America. The voter education that would be necessary to combat the misinformation that outside groups with deep pockets would spread would cost Oregonians vast sums unnecessarily. Please don't abdicate your responsibility in order to avoid partisan criticism.
