

Rules Committee,

It always amazes me how long it takes for broad social change to integrate .

The decision to count votes just actually count each vote is long overdue.

We have the internet, not a bunch of steam engines and horses... it's time.

We can communicate and make decisions for ourselves. Each one of us and that is a democracy.

I don't feel that's what we have anymore in this country - so if anyone ever reads these letters - its your job to step up- now. And change things.
