

Rules Committee,

I'm writing today to ask you to support HB 2927 without attaching amendments. I support this bill.

Too often I have felt that my vote has no meaning in the vote for the President of the US. I have continued to vote. I don't expect the vote to always go my way but I will at least know that it is actually who the voting American people want, not a small group of people.

Often enough the electoral college has not supported the vote of the people in the Presidential elections. Oregon needs to be part of the movement in this Country in support of the popular vote.

Thank you for finally having a hearing on this bill
