

Please do not allow either of these bills to pass. Our small counties here in Central and Eastern Oregon already have approved industrial areas that for the most part are quite healthy for the Counties sizes. Fossil (Wheeler County) has a small one with at least one small mill in it and a couple of other things. Burns (Harney County) has a larger one with several businesses already there and some coming. A person can already get a mining claim for small mines of many kinds. We do not need any big open pit mines. Most of us that live in these small counties live here because we like it here, and we like the country the way it is without big industry and many⁷ more people. I live in a very remote part of Jefferson County and do not want to see big industry or destination resort type things here. this sounds like measure 37 back at us again in many ways. We should not have that back at us again.

Thank you Ann Snyder
