

Please find the attached Resolution as written by AZ LD 27 as testimony in opposition to NPVC. I implore the members of the Oregon legislature to vote NO on this dangerous legislation. Shame on the Legislators for even considering this corrupt scheme. What makes either the Legislators or voters of Oregon believe they have the independent authority to fundamentally change the Constitutionally determined methodology for electing the President of the United States for the 30+ States who strongly oppose this legislation. Our Constitution has a process to make significant changes to our Constitution. If proponents of the NPV want to make this change let them propose a Constitutional Amendment. If 34 States agree to this change then so be it but in the meantime it is arrogant and selfish for the voters in a minority of States to make deem themselves empowered to change a National election that effects all citizens without their consent or input.
