

Rules Committee,

The Electoral College has outlived its usefulness. Although it's only happened a few times, 2016 proved it's time for it to go. To have put into the presidency, someone who lost the popular vote by three million votes says it all. To have put into office someone totally unqualified to serve demonstrates that our system no longer works.

HB2927 helps solve this issue by putting in place the awarding of electoral votes to the state legislatures, as required by the U.S. Constitution, and makes more accurate the one person / one vote concept.

It's past time to correct this issue.

Respectfully,

Ned Glassman
