

Rules Committee,

The Electoral College is a relic of the past and a political compromise borne out of the tension between the industrialized northern states and agricultural south in the early days of our country.

Every other elected office in this country depends on the will and votes of the majority, not the minority.

Please give HB2927 a favorable hearing and pass this legislation on for further action. It is time to bring our electoral process into the 21st century.

Sincerely,

Paul Primak
