

Rules Committee,

Hi there,

I believe all people should have the right to be counted in voting for the president of the U.S. The electoral college is an antiquated system that does not allow that right, especially for states such as ours that is not a key state. I can't think of any good reason that the electoral college should exist. It seems that since the vast majority of Oregonians have approved of this legislation of National Popular Vote there should be no question that it should pass. Please, do what's right by representing that majority and support HB2927.

Yours,
