

Rules Committee,

Every person's vote should count.

When you have certain States, that have more Electoral College votes, then there are those whose votes do not count at all! Here in the West, we are tired of the National elections being decided before our votes are even counted! Why even vote? I'm sure that's why many don't vote; because only a handful of States 'really' decide who wins. With the population spread across the country now its TIME to do a Popular vote for National elections.
