

Rules Committee,

I am a trained historian with advanced degrees in History. My understanding is that nothing in our Constitution is exempt from amendment. This includes the selection of president under the electoral college system.

The electoral college was originally intended to ensure the rule of wealth, educated, white men and has become an anachronism hindering our modern government.

Federal senators were originally selected by this method from state legislatures. That process was changed and sets a precedent for amending our constitution to eliminate the electoral college to elect out president.

Please support and pass this bill
