

Rules Committee,

I strongly support local legislation supporting transition to National Popular Vote in presidential elections. There are many reasons this is important and long overdue, but I will focus on just one. The political sectoring of our country distorts where candidates focus their campaign, including what their focus is, when confined to so called "battleground states." This ignores constituents and related policy issues; basically distorting our political process, including the mental attitudes of candidates. Lets let Oregon once again be a progressive leader in the nation. We no longer need to deliver delicate ballots by horseback.
