

Rules Committee,

I whole heartily back HB2927. Like most Oregonians I want our President to be elected by a national popular vote. I see this will more fairly express the will of the people of this state and country than the ancient, outdated agrarian, post colonial, pre-industrial construct of the electoral college. in this post-industrial-information age, it is time to bring our way of voting for our president into fairness and modernity that compliments our great democracy. Thank You!
