

Hello -

I'm really disappointed that even in 2017 we're planning on doing more highway widening. We need better, more reliable transit, bike lanes and pedestrian improvements. Widening a highway wont solve anything. It never has.

Please make the right choices and prioritize real solutions that help with our traffic problems like congestion pricing, increasing parking, and encouraging alternative modes of transit.

We also need to stop polluting our environment, as well as the globe. Highway widening does nothing to help that.

Thank you,

Jesse Enlund
