Dear Derrick Wheeler,

Is it possible that you deliver this message to the House Agriculture and Natural Resources Committee before the hearing on February 7?

Dear Committee members:

I am writing in support of HB 2043, which helps fund Oregon Department of Agriculture's noxious weed program.

As a citizen volunteer involved on the ground in invasive plant removal, I know how much we need a strong and robust program to address the issue of invasive plants. Please fund ODA's noxious weed program and support HB 2043.

Thank you,

Margaret Stephens
