

BEFORE THE BUSINESS AND TRANSPORTATION COMMITTEE

Senate Bill 85

Testimony of Jon Cray

Oregon Public Utility Commission

February 8, 2017

Senate Bill 85 is designed to change the composition of the Telecommunication Devices Access Program (TDAP) Advisory Committee. Existing statute requires a twelve-membership committee specifically comprised of seven (7) individuals who are deaf or hard of hearing, one who has a speech disability, one who has a disability, one professional in the field of speech, hearing, or disability, one member of the Public Utility Commission, and one telecommunications industry representative.

However, the advisory committee has not had a full membership in seven (7) years despite recruitment efforts that included, but was not limited to advertisements and outreach to disability-related organizations. Also, the advisory committee, in 2009, amended the bylaws to reduce the term requirement from four (4) years to two (2) years and to host meetings biannually instead of quarterly to attract potential volunteers, but membership only averaged eight (8) individuals.

The Public Utility Commission's proposal to reduce the size of the advisory committee is based on the seven (7) member requirement for the Commission for the Blind. Senate Bill 85 modifies the composition of the advisory committee to consist of three (3) who are deaf or hard of hearing, one who has a speech disability or other disability, one who has a vision impairment, a professional in the field of speech, hearing, vision, or other disability, and one telecommunications industry representative.

The TDAP Advisory Committee supports this bill.

The Public Utility Commission urges you to pass this bill, which provides for a more balanced representation of Oregonians with disabilities and allows the advisory committee to have sufficient membership.
