RE: Senate Bill 178 - Extending rural provider tax credit

Dear Senator Monnes Anderson and members of the committee:

Providence Health & Services continually strives to ensure that individuals residing in the rural communities we serve have timely access to the highest quality health care services. While we are accomplishing this in a number of innovative ways, our success ultimately depends on the willingness of qualified clinicians to live and work in rural communities.

This program serves two critical roles in addressing the work force issues many of these Oregon communities face: it acts as a motivator for clinicians when choosing between rural and urban settings; and offers important on-going assistance to providers and their families. As such, the tax credit extended in SB 178 should be seen as key to achieving health care transformation efforts statewide and a direct investment in the frontline clinicians themselves.

Oregon's investment in rural clinicians will yield immediate long-term benefits for the communities they serve. Thank you for the opportunity to comment on Senate Bill 178, we hope you'll join us in support.

Sincerely,

A handwritten signature in black ink, appearing to read "Dave Underriner".
