

**SB 199 STAFF MEASURE SUMMARY**

**Senate Committee On Environment and Natural Resources**

---

**Prepared By:** Beth Patrino, LPRO Analyst

**Meeting Dates:** 2/16

---

**WHAT THE MEASURE DOES:**

Establishes a product stewardship program for household hazardous waste. Defines terms, including what "covered product" means and does not mean. Prohibits a manufacturer or retailer from selling or offering for sale any covered product in Oregon unless the product is labeled with a brand and the brand is included in a product stewardship plan approved by the Department of Environmental Quality (DEQ). Requires manufacturer or retailer to provide consumers with information about available collection opportunities for covered products at time of sale. Requires annual registration by product stewardship organization with DEQ and payment of annual administrative fee. Requires stewardship organization to submit plan to DEQ at time of fee payment. Lists plan elements. Requires annual report on plan implementation. Directs DEQ to review and approve within 90 days of submittal plans that comply with requirements. If DEQ determines plan does not provide convenient service in a county where publicly owned or contracted household hazardous waste collection site is located, allows DEQ to require stewardship organization to pay site for collection of waste. Directs DEQ to establish statewide collection target based on weight of covered products managed in specified years and inform each organization of its return share for following calendar year. Creates Hazardous Waste Stewardship Fund. Operative on January 1, 2018.

*REVENUE: May have revenue impact, but no statement yet issued*

*FISCAL: May have fiscal impact, but no statement yet issued*

**ISSUES DISCUSSED:**

**EFFECT OF AMENDMENT:**

No amendment.

**BACKGROUND:**

Product stewardship programs require manufacturers to share in the financial and physical responsibility for collecting and recycling products at the end of their useful lives. There are two statewide product stewardship programs currently operating in Oregon addressing paint and electronic equipment.

In 2007, House Bill 2626 established a statewide program financed by manufacturers for recycling computers, monitors and TVs. The program allows anyone bringing seven or fewer items at one time to recycle their electronics at no charge at participating collection sites. In 2015, computer peripherals (keyboards and mice) and printers were added to the program.

In 2009, House Bill 3037 created a paint stewardship pilot program to reduce the generation of post-consumer paint and required the creation of a stewardship organization made up of paint manufacturers to implement the program by developing a plan and funding its implementation, including the development of educational materials for consumers. Under the legislation, consumers may take unwanted paint to locations throughout the state for disposal. The program was made permanent in 2013.

Senate Bill 199 would establish a product stewardship program for household hazardous waste.
