

From the desk of State Representative Rob Nosse:

Vote Yes on Senate Bill 339A

On behalf of the undersigned organizations, we encourage you to vote in favor of Senate Bill 339A.

SB 339A is technical fix to the Clean Electricity and Coal Transition Act, SB 1547, from the 2016 Legislative Session. During the February 25th, 2016 Work Session in the House Committee on Rules, parties indicated the intent to return in 2017 to make this technical fix, capping the contribution from biomass cogeneration facilities to Oregon's small-scale renewable energy requirement.

We encourage a yes vote on Senate Bill 339A.

Thank you,
