<cyber OREGON>

We Support SB 90 | *Unifying Cybersecurity in Oregon*

Information security is woven into the fabric of public trust--we owe Oregonians a duty to protect their personal information and ensure systems are secure. At the same time, Oregon requires a long-term multi-sector cyber strategy that leverages the private-sector expertise of Oregon's cyber-related industries, enables information sharing, anticipates cyber disruptions and builds capacity across the state and with our local government partners and school districts. SB 90 and the Cyber Oregon initiative will enhance Oregon's cybersecurity through 4 measures <

1. SB 90 **enhances state government IT security** by unifying IT security functions and personnel within the Executive Branch--extending, E.O. 16-13, "*Unifying Cyber Security in Oregon.*"
2. SB 90 establishes the **Oregon Cybersecurity Advisory Council** for information sharing and cyber workforce development.
3. SB 90 lays the foundation for the development of a **Cybersecurity Center of Excellence.**
4. SB 90 enables Oregon to compete for **cyber grant funding** and establish cross-sector partnerships >

SB 90 and Cyber Oregon is proudly supported by the following organizations <
